Intersections™

We are happy to introduce Intersections. Installations where conversation and fun come together.

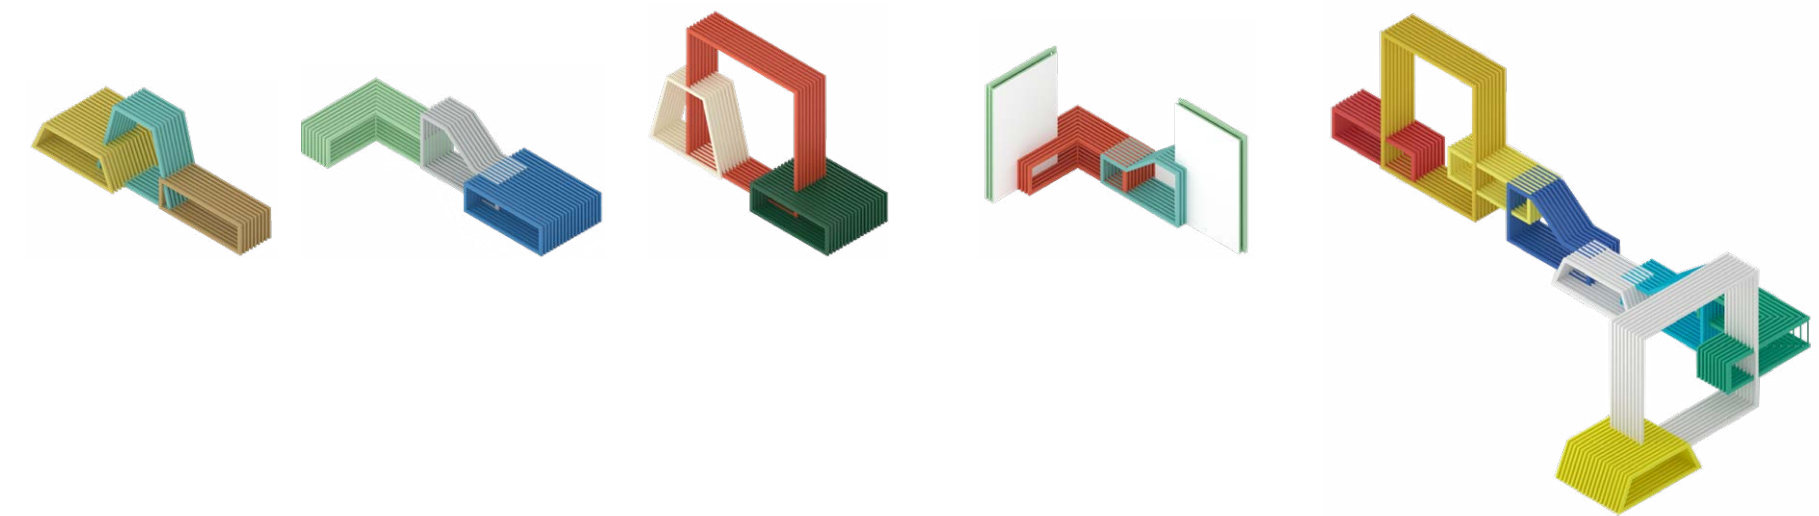

Intersections™

Intersections™ are created with a modular system of geometric shapes that can be freely rearranged. Each element slides into the other creating an interwave-like pattern of color and form.

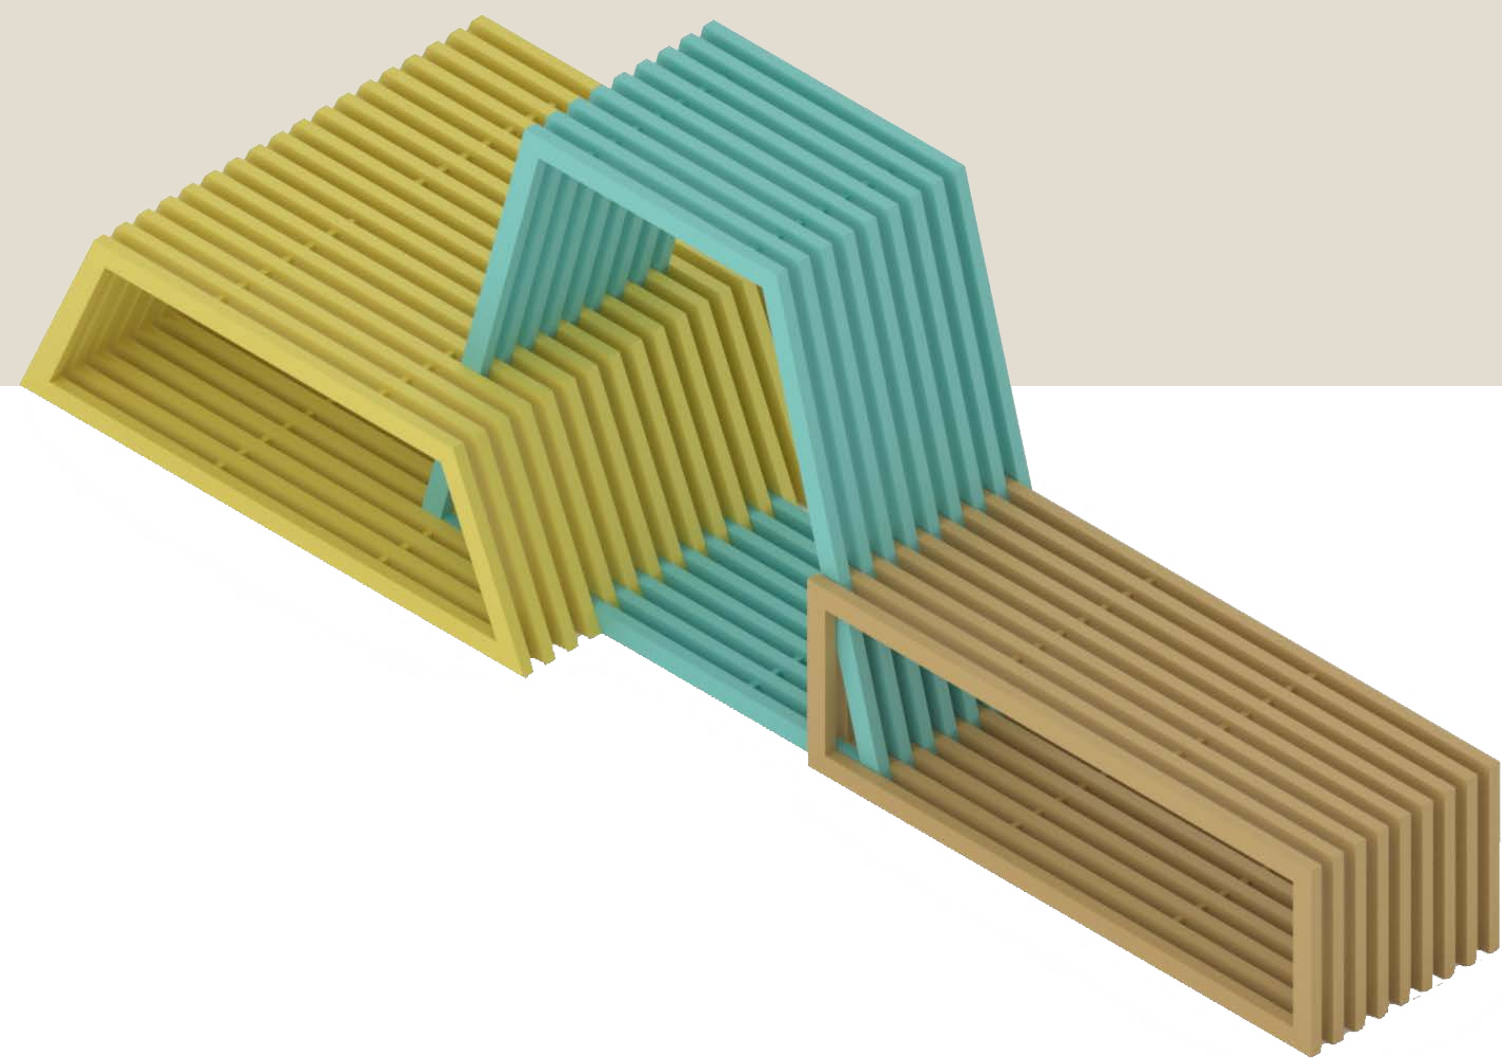

These geometric installations provide versatile functionality for both outdoor and indoor spaces. Multiple functions naturally intersect with each other, creating a unique interaction between users, spaces and objects. Whether it is a park, public square in a city center or a store, Intersections create very special spaces for visitors.

Sun-sensing Insects

Sunlight and shadows are the materials
in this public art installation.

Sun-sensing Insects

The Sun-sensing Insects come alive with the rising sun as the shadows travel across the wall. A playful image of the insects appears, and changes as it slowly moves across the wall with the changing position of the sun. The size and shape of the shadows vary, depending on the hours and season.

The installation introduces an element of surprise and intrigue, inviting the passers-by to observe the changing details in our surroundings.

Movie

Observe the movements of the shadows here: <https://www.youtube.com/watch?v=e8JWG1jOrXc&t=16s>

The Spill

A play sculpture resembling an oversize cup which fell down and juice is spilling out.

The Spill

This play sculpture looks like an oversize cup, from which juice is spilling. The juice spill is also a slide for children, while the bottom of the cup is a climbing wall.

A little plate is also part of the installation, and functions as a sandpit for children. Children are inspired to partake in a variety of fun – jumping, rolling, hiding. Color blots with painted numbers are an unconventional interpretation of hopscotch.

Geometric Garden

A play sculpture inspired
by nature.

Geometric Garden

Geometric Gardens was made to stir the children's imagination, providing diverse opportunities for creative play.

This play installation references traditional playgrounds created from steel pipes but at the same time has a contemporary appearance. The emphasis is on the natural environment, created both by the round shape of the structure as well as the shades of green. It resembles an abstract garden.

Stack Play Houses

A playful and minimalistic play sculpture for kids.

Stack Play Houses

A play sculpture made out of stacked volumes that look like little houses piled on top of each other. It provides a cheerful and creative playground for kids where they can hide and play.

The eye-catching play structure will introduce a great, contemporary element to urban squares, housing developments or green areas and parks.

Urban rooms

Brightly coloured steel structures are shaped into forms echoing houses.

Urban Rooms

Brightly coloured steel structures are shaped into forms echoing houses. The effect is immediate.

Placed on public squares, urban roadsides or in parks, the minimal structures create intimate areas in the open air, stimulating interaction between people. Strangers strike up conversations and children clamber along the frame.
