

Intersections - Catalog

POLY

We are happy to introduce
Intersections – urban installations
where conversation and fun come
together.

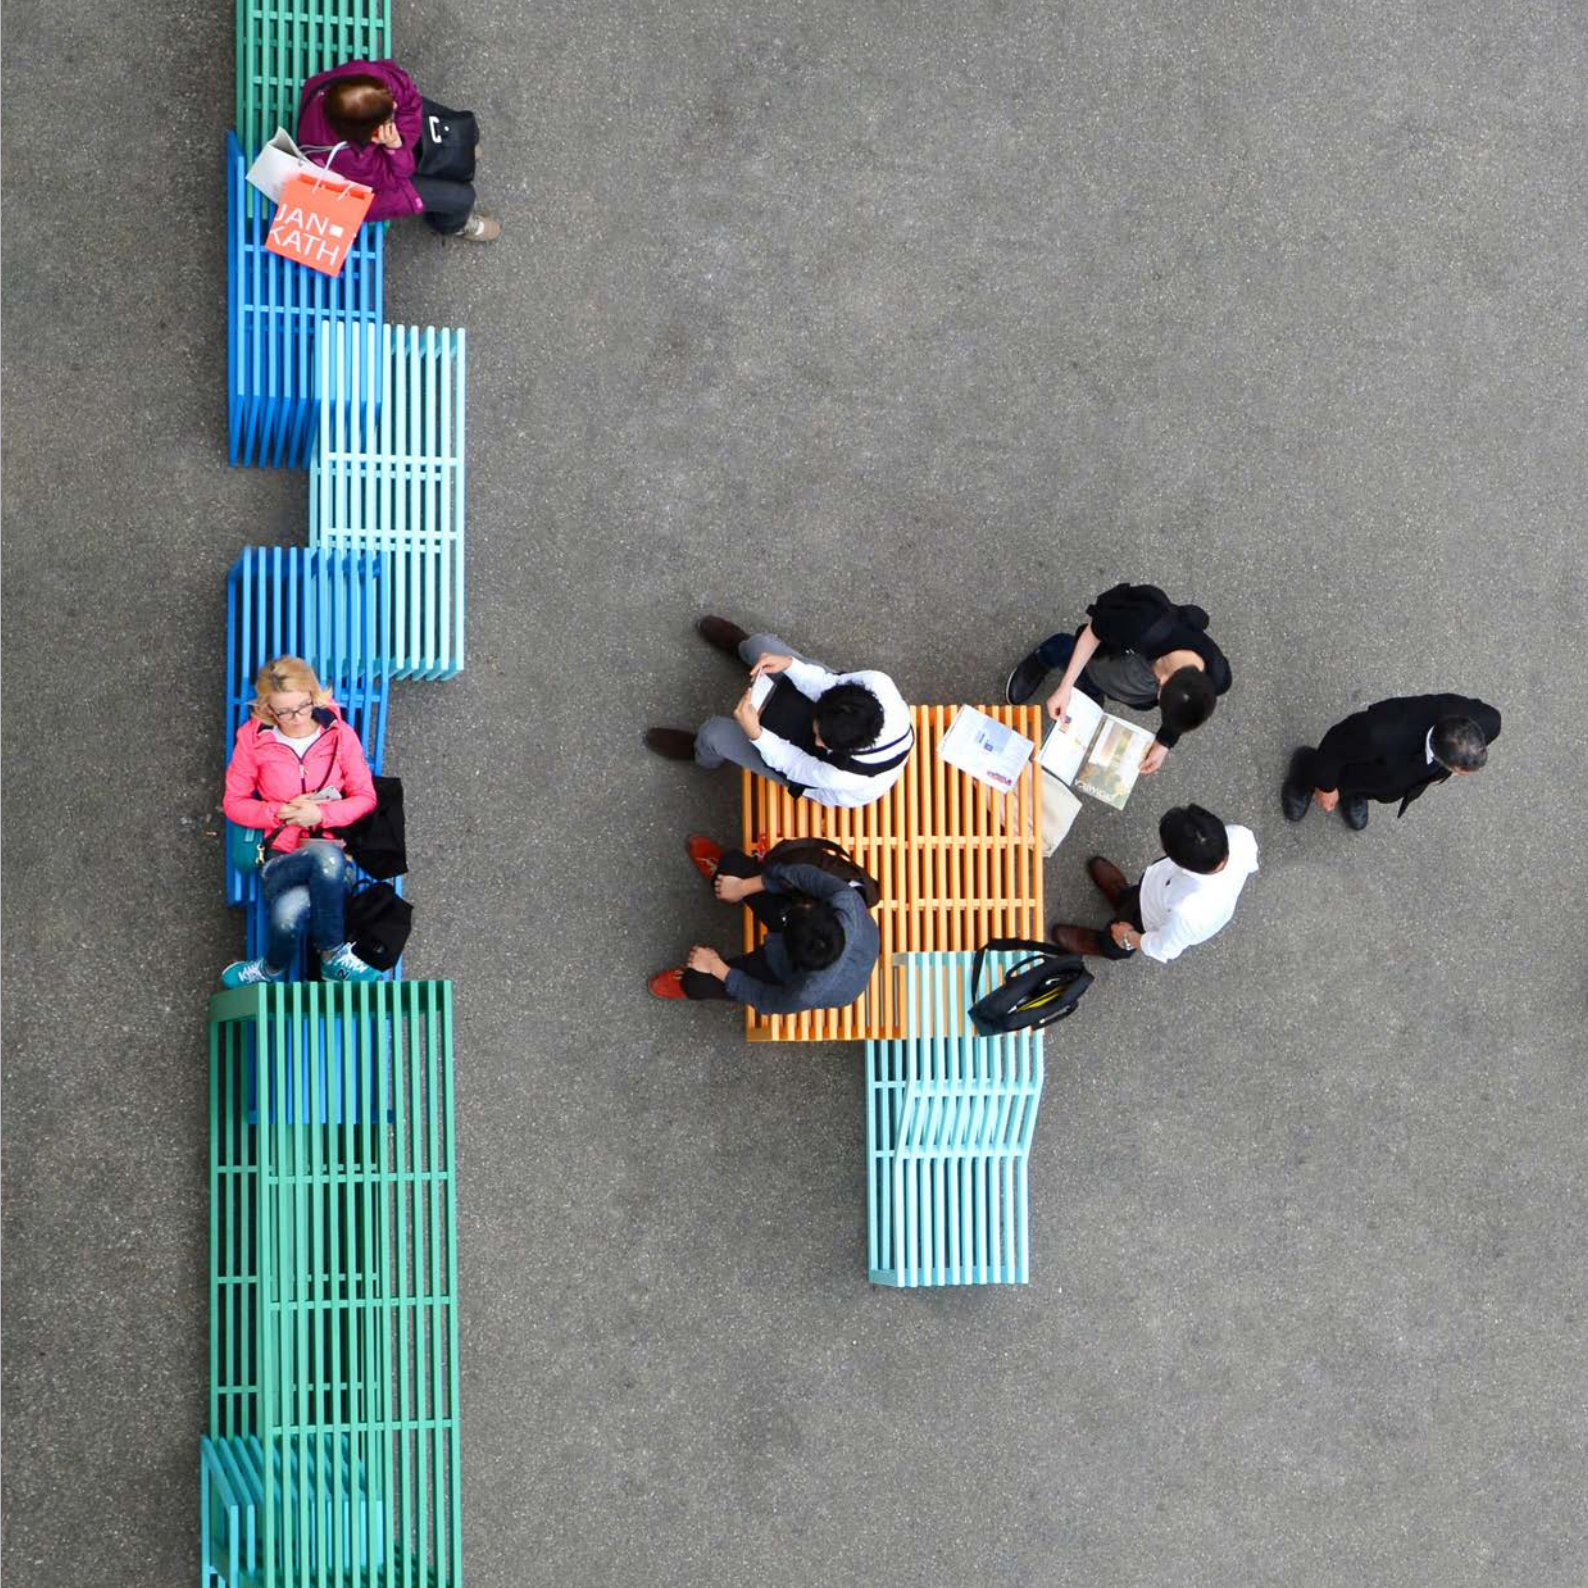

In such a fast-paced world, it
is more important than ever to
cherish moments with our friends
and family in inviting and beautiful
surroundings. We invite you to
discover the colorful and functional
world of **Intersections™**.

intersections

are created with a modular system of geometric shapes that can be freely rearranged. Each element slides into the other creating an interwave-like pattern of color and form.

These geometric installations provide versatile functionality for both outdoor and indoor spaces. Those functions naturally intersect with each other, creating a unique interaction between users, spaces and objects. Whether it is a park, public square in a city center or a store, Intersections create unique spaces for visitors.

meet

Intersections create friendly and uplifting meeting spaces, which draw in and captivate people for all sorts of activities. The possibilities are only limited by their imagination!

People are invited to sit, relax and search for the best position. They can use Intersections as a meeting spot, a space for sitting, waiting and reading.

relax

Thanks to different shapes and modules, visitors feel encouraged to explore different uses for the installation. It takes no more than 5 minutes for busy professionals, inner-city dwellers or pensioners to start intuitively enjoying the many relaxing positions the Intersections offer in a public space.

play

Children are truly in love with Intersections and claim them as their personal playground. They find the colorful installation really appealing.

The joy of watching them climb up and through the elements is truly priceless.

The work is very open and provides endless possibilities for creative play. Everything is up to child's imagination. All of that makes Intersections a perfect solution for children-friendly spaces.

exhibit

Intersections provide multiple options for displaying information. Outdoor exhibitions created by the use of the Intersections exhibition system combine traditional exhibition displays with a friendly, interactive space where people can meet, chat, rest or play. The installations display information and at the same time draw in and captivate people for all sorts of activities.

capture

The geometry and colorful environment of Intersections creates natural and appealing spaces for amateur and professional photoshoots. Thanks to simple shapes and vivid colors, it is a great base to create any story with photography or film.

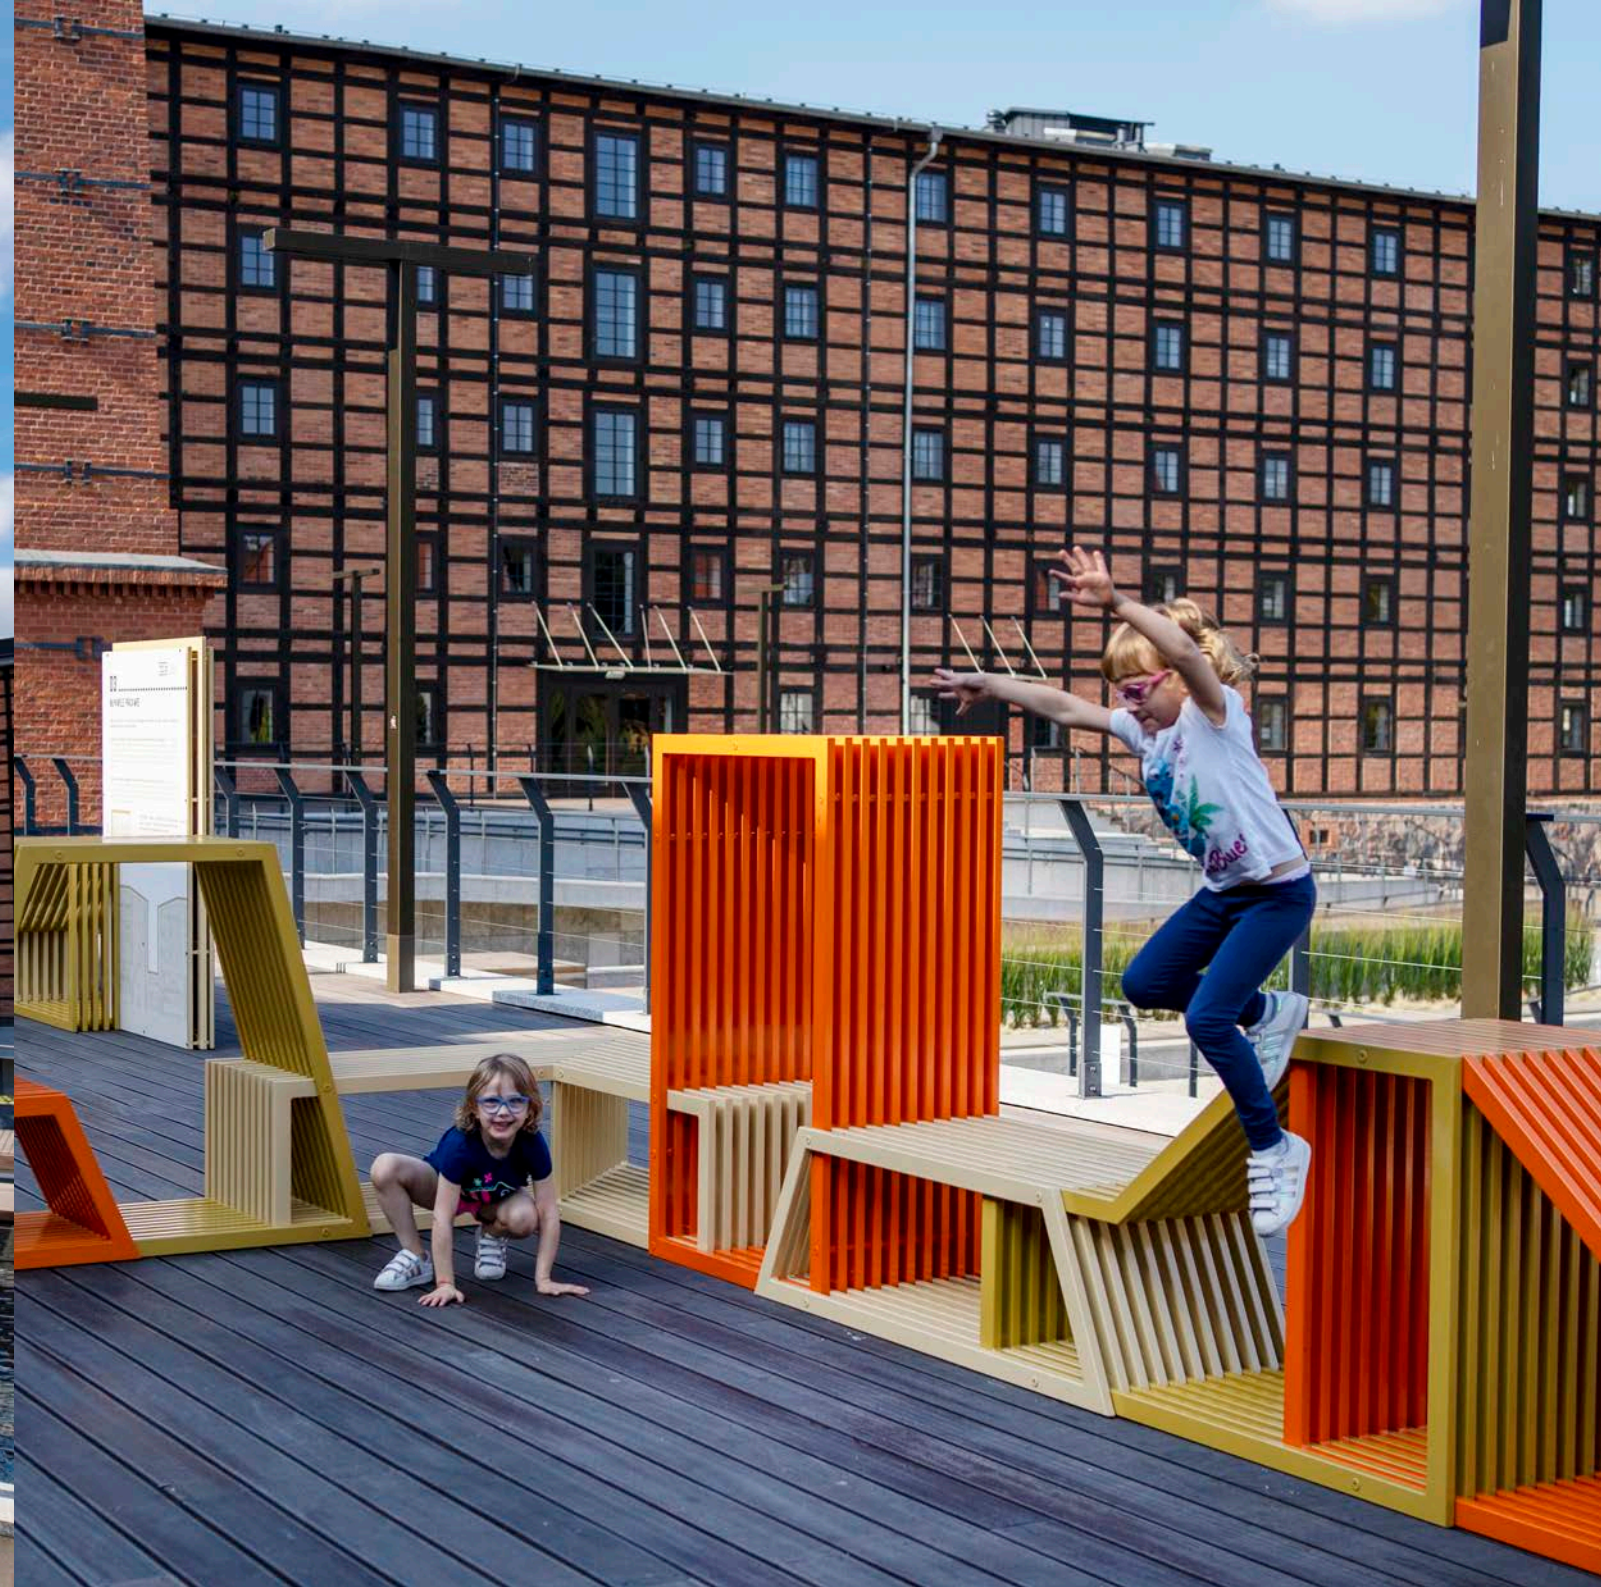

store

Intersections provide multiple options for storing and displaying objects in stores, pop-up spaces and markets. Products can be placed inside or on top of the modules. There is the possibility of creating custom-made shelves or rails tailored for different products e.g. wines, clothes, toys.
